

MULTI SENSOR IOT DEVELOPMENT KIT

A quick and easy way for IoT development

The Multi sensor IoT development Board is a state of the development environment which helps to reduce the engineering efforts for building your IoT hardware solutions. This combines advanced wireless technologies and Sensors which enables our customers to implement various functions like sensor node, Gateway and Edge computer.

KEY FEATURES

Processor

- 32 Bit
- 64MHz Clock
- 256K Flash Memory
- 32K SRAM
- Fail-Safe Clock Monitor mode

Communication

- LoRa
- WiFi
- Simple RF Link
- 32K SRAM
- Fail-Safe Clock Monitor mode

Sensors

- Temperature
- Humidity
- Light
- Accelerometer
- Gyro

Expansion slot

- UART
- SPI
- I2C
- ADC Inputs
- Digital Inputs
